09/14 - 09/18

B.Eng Electrical and Electronics Engineering - Second Class Honours Upper Division

Top Klass College Ilorin

02/08 - 06/18

West African Senior School Certificate Examination

Projects

Design and Construction of Prepaid Electricity Billing Meter

09/17 - 06/18

- Nigeria as a nation has over time been riddled with irregularities in measuring and paying for electricity utility bills. As a solution driven individual I sought for ways to bring a lasting end to this problem albeit in form of a prototype that can be improved upon.
- This project not only seeks to accurately evaluate Electrical loads consumption of a client but also provides means of conserving power consumption in cases of low credit.
- It seeks to cut-off high power consumption loads automatically when the client's credit is low and provides a means of paying for utility credit with the use of a GSM phone

Key Skills

- Excellent verbal and non-verbal communication abilities while exhibiting confidence and respect for clientele.
- Ability to work in collaboration with a varied group of people.
- Skilled in exhibiting empathy during ideas exchange and mediation.
- Broad-minded to new ideas and methods of arriving at a targeted goal.
- Possessing the time utilization skill required to get the job done.
- Distinctive traits of integrity, commitment and dependability.
- Advanced proficiency in the use of Microsoft Office tools such as Word, Excel and PowerPoint.
- Financial Modeling and Statements Analysis

Interests

- Passionate about community development services and grassroots campaigns on the implication of human trafficking.
- Traveling and exploring new environments.
- Avid follower of both football and basketball.
- Passionate and determined to provide greater health care products to the less privileged
